GME APOLLO PROGRAM

WOULD YOU EAT THE MOON IF IT WERE MADE OF BBQ SPARE RIBS?

Yes, I would have seconds and then polish it off with a tall, cool Budweiser. GameStop has announced that Moonjam will be taking place July 20 through August 20. The point that stands out in their announcement is the emphasis of humans first landing on the moon 52 years ago, implying this time it will be apes that make the journey this year. The month long event in Minecraft begins with a critical mission of partying, kicking off the first day with a live concert. While apes have traveled through space before, no primates have reached the lunar surface...yet.

Launch Protocol

1. BUY
2. HODL
3. ~~VOTE~~
4. MEME

Go / No-Go for Launch

The launch checklist by **u/stevetheimpact** is still in a Go For Launch status, as all rules necessary for lift off are in effect, even if enforcement may not be happening. Several other rules were filed but mostly relating to changing risk modelling. More wrinkles are needed but the tower has still given the all clear for launch.
